-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Stemp et al EP 0190496 in view of Ward et al US 5,872,132.

***Determination of the scope and content of the prior art (MPEP §2141.01)***

Stemp et al EP '496 to a process for converting 4-fluorophenyl-piperidine carboxylate type compounds in the same type manner as recited in the claims. See page 8 lines 20+ and page 9 reaction b). Ward et al '132 teach the final products to be well-known. See columns 6-7, examples 1-19.

***Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)***

Stemp et al differs in that the specific 4-fluorophenyl-piperidine carboxylate starting material is not exemplified. However, Stemp et al does teach that the process taught therein can be varied for application of other related materials depending on the final product desired. See, for example, page 6 last full paragraph and page 7.

**Finding of prima facie obviousness--rational and motivation (MPEP §2142-2413)**

To modify the teachings of Stemp et al '496 would have been obvious to one of ordinary skill in the art as the use of somewhat different but otherwise analogous starting materials would have been obvious and the results would not have been unexpected particularly as the final product is known as taught by Ward et al '132.

No claim is allowed.
